

# MUSTOPHA A. ABDULQADIR

## Full Stack Developer

Mobile: +2348112021272 | Email : [abdulqadirmustopha@gmail.com](mailto:abdulqadirmustopha@gmail.com) | [LinkedIn](#) | [Github](#)

### PROFILE SUMMARY

---

**Full-Stack Developer** with hands-on experience building responsive web applications, secure RESTful APIs, and authenticated multi-role dashboards using Node.js, Express.js, MongoDB, React, Next.js, and TypeScript. Experienced designing and shipping LMS, fundraising, and AI-assisted platforms end-to-end, from database schema and API architecture to pixel-perfect, accessible frontend interfaces. Comfortable owning features across the stack, integrating third-party payment gateways, and deploying to Render and Vercel within Agile, cross-functional teams.

### TECHNICAL SKILLS

---

- **Languages & Frameworks:** JavaScript, TypeScript, Node.js, Express.js, React.js, Next.js
- **Databases & Security:** MongoDB, Mongoose
- **APIs & Auth:** REST APIs, JWT, RBAC
- **Frontend & Styling:** Tailwind CSS, Responsive Web Design, Vite
- **DevOps & Tools:** Git/GitHub, CI/CD, AWS, Vercel, Render
- **Methodology:** Agile/Scrum

### PROFESSIONAL EXPERIENCE

---

#### Tech Lead & Full-Stack Developer (Volunteer) | NextIF ([nextif.org](https://nextif.org)) May 2025–Present

- Led the frontend and full-stack development of core web platforms from the ground up, driving technical architecture, component design, and fast, high-quality feature delivery.
- Delivered responsive React, Vite, Tailwind CSS interfaces with semantic HTML5 and mobile-first design.
- Built two dual-portal LMS from the ground up, covering frontend architecture, API development, and deployment workflows.
- Served 100+ active users through secure certificate-payment flows, real-time transaction tracking, and webhook-based payment verification.
- Improved frontend quality through code reviews and performance optimization focused on Core Web Vitals.
- Developed a Node.js/Express REST API with MongoDB for dynamic tasks, payment webhooks, and automated email notifications.

#### Frontend Developer | DoLesssons ([dolesssons.com](https://dolesssons.com)) Jan 2026–Present.

- Built responsive landing pages and authenticated dashboards using Next.js, TypeScript, and Tailwind CSS.
- Translated high-fidelity Figma designs into reusable React components to support faster feature delivery.
- Integrated REST APIs with loading states, error boundaries, and input validation in collaboration with backend engineers.
- Resolved client-side UI performance issues using React Context and modern state management strategies.

#### Frontend Developer & Tech Lead (Volunteer) | Infaq.ng — Fundraising Platform Dec 2025–Present.

- Led the technical direction and frontend architecture for a comprehensive fundraising web platform, building responsive public pages, detailed campaign views, and data-rich interfaces from the ground up.
- Built responsive public pages, campaign views, and data-rich interfaces for a fundraising platform.
- Integrated secure payment flows for user donations, including receipt states and real-time payment tracking.
- Built authenticated dashboards for three user groups: Donors, Campaigners, and Admins.

- Defined data contracts, error handling, and validation rules with backend collaborators to support frontend performance.
- Full-stack Web Developer ( *Volunteer* ) | BTWAWI([btwawi.com](https://btwawi.com))** **June 2025–Present.**
- Developed responsive React and Tailwind CSS interfaces with an accessibility and mobile experience focus.
  - Integrated Node.js and Express backend services to handle form submissions and donation processing. • Improved maintainability by connecting frontend and backend workflows more cleanly.
  - Used Git, GitHub, and Vercel across the development-to-deployment workflow.

PROJECTS

---

**NextIF Accelerator Platform — Dual-Frontend Full-Stack Application** [Mentee Live](#) | [Admin Live](#)

- **Mentee Portal:** Personalized dashboard featuring XP tracking, task submissions, event attendance, and integrated payment flows.
- **Payment Integration:** Implemented a secure checkout gateway enabling mentees to purchase graduation certificates, managing backend verification webhooks and success/failed UI states
- **Admin Portal:** Comprehensive admin interface for mentor management, CSV bulk onboarding, submission reviews, and campaign transaction tracking analytics.
- **Backend API:** Built a robust Node.js/Express RESTful API featuring dynamic task management (Weekly/Monthly/ADHOC), secure third-party payment verifications, automated email notifications, and file uploads via Cloudinary

**e-Likita — AI-Powered Hospital Consultation Assistant** [Live](#) | [FE Repo](#)

- Developed responsive React/TypeScript interfaces with TailwindCSS; integrated Axios for secure frontend-backend communication with proper error handling and data validation
- Contributed to backend API design using Node.js, Express.js, and MongoDB; implemented Google AI SDK (Gemini) for AI-powered medical assistance features

EDUCATION

---

- **Bachelor of Science (BSc.)- Computer Science, Second Class Upper Division**  
Kwara State University, Nigeria
- **Diploma in Computer Engineering and Networking**  
Omnitech Computer College
